**Schlosser Signs migrates to *dataSIGN***  
*dataSIGN's Sign Manufacturing Solution to Streamline  
Successful Colorado Custom Sign Company*

LOVELAND, CO and MINNEAPOLIS, MN - December 3, 2008 - Integrated enterprise business system provider Data.com International, Inc. ("Datacom"), today announced that Schlosser Signs, Incorporated, ("Schlosser") an established custom sign manufacturer located in Loveland, CO has expanded their relationship with Datacom by making a decision to upgrade to the full *dataSIGN* solution, from its *dataSIGN/XPRESS* version, a subset offered by Datacom.

*dataSIGN/XPRESS* was released as a solution to meet the complicated estimating and quoting scenarios found in the custom sign manufacturing industry today. This combined with the robust Contact Relationship Manager (CRM) provided a complete solution to the front line sales organization for custom sign manufacturers. This was provided with the same centrally hosted, data secured, internet-based model offering availability from anywhere, anytime as the full *dataSIGN* offering.

In May of 2008, Schlosser selected *dataSIGN's* XPRESS product. After only a few months of using the front end modules, Carla Schlosser, Owner, stated "We were very happy with the improvements we have seen come from the *dataSIGN/XPRESS*, and our team is ready to implement *dataSIGN* and get even more from the full suite."

Tom Bures, Datacom's Sales and Marketing Manager, stated, "It has always been Datacom's goal to provide the best industry solution. This is just one example of the successes smaller manufacturers are seeing from Datacom's industry specific offerings." Bures added, "The Schlosser Signs' Team is great to work with and we are very happy to see their dedication to success."

**About Data.com International, Inc.**

Datacom develops, markets and supports web-native, on-demand applications and services that are specifically designed to enable small to mid-size manufacturers to leverage the Internet to most efficiently conduct all aspects of their business. By tightly integrating full-featured back-office ERP applications with leading edge Web-centric collaboration capabilities and ecommerce functionality, Datacom provides small to mid-size manufacturers with the complete solution they need to compete and grow in the new global economy.

Datacom's *dataSIGN* suite of integrated back office and CRM applications was developed very specifically to serve the needs of the custom sign manufacturer and promotes the use of best industry practices. With CRM functionality fully integrated with all of *dataSIGN's* estimating, manufacturing and financial modules, *dataSIGN* provides sign manufacturers with the necessary tools and solutions to achieve world-class performance in sales force efficiencies and in customer and supplier relationships.
